TF5000 Series Load Bay NEMA TS-2, Type 1

DATA SHEET

DESCRIPTION

Eagle load bays are available in dedicated four, eight, twelve, and sixteen load switch configurations. The TF5000 series load bays are hardwired for ease of maintenance and economical modification. The flash indication colors can be programmed from the front panel, using only a screwdriver. The load bays will fit into most existing Eagle cabinets and can be installed in less than four (4) hours.

Note: The TF5016 and TF5116 loadbays will only fit in size 6 or larger cabinets.

Part Number	Controller	Monitor	Load Switch Position	Flash Relay Positions	NEMA-2 Circuit Flasher	Dimensions
TF5004	NEMA TS2, Type 1	MMU	4	2	1	18.5" H x 19.25" W
